Total Records 689 *Total Hourly Average* \$19.45

Note: The purpose of this report is to provide union wage data. "Unknown" under the "City" header represents those records that were entered without an actual city because workers are employed all over Manitoba. Examples: Government of Canada, Manitoba Government Employees. Leaving the pay period field blank will generate a report that includes all pay period types in the database. The record count will be correct but the grand total average will be incorrect. Pay period types are: Hourly, Bi-weekly, Daily, 13 Pay Periods, Monthly, Semi-Monthly, Weekly and Annually. All hourly rates below minimum wage were dropped from the average calculation. This database was last updated January 29, 2010.
